LV Magic Star Plus – atvilktnes montāžas un regulēšanas instrukcija
EN Magic Star Plus profile drawer assembly and adjustment instructions

1. Atvilktnes fasādes stiprinājuma uzstādīšana / Installing of front attachment

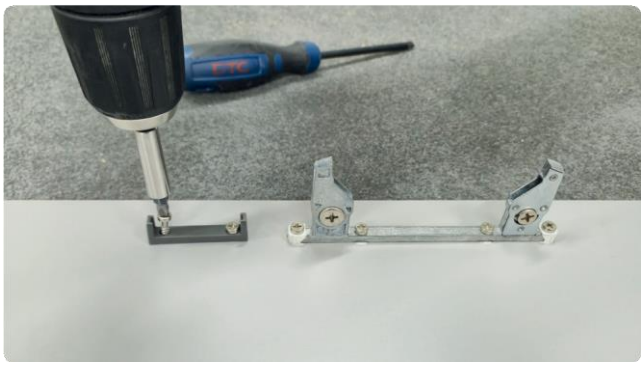

Zemā atvilktne / Low frontbracket

Augstā atvilktne / High frontbracket

LV Novietojiet priekšējo stiprinājumu virs izurbtajiem caurumiem. Uzmanīgi iespiediet stiprinājumu līdz galam caurumos. Pievelciet priekšējā stiprinājuma skrūves (**nepievelciet tās pārāk cieši**). **UZMANĪBU!** Rūpīgi notīriet darba virsmu. Pat neliels netīrums vai svešķermenis var sabojāt atvilktnes fasādi. Lai pasargātu fasādi no skrāpējumiem un bojājumiem, starp atvilktnes fasādi un darba virsmu novietojiet kartona gabalu vai citu mīkstu aizsargmateriālu.

EN Place the front bracket over the drilling holes. Press the bracket carefully to the bottom of the holes. Tighten the screws on the front bracket (do not tighten too tightly). **NOTE!** Clean working area carefully. Even small piece of impurity may damage drawer front. Use piece of cardboard etc. between drawer front and worktop as a cushion.

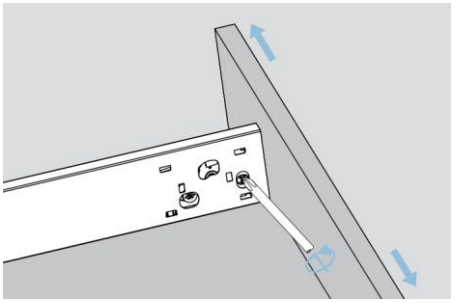

LV **Uzstādot atkritumu šķirošanas mehānismu,** pie atvilktnes fasādes atzīmētajos caurumos piestipriniet arī komplektā iekļauto papildus stiprinājumu..

EN **During installation of the waste mechanism**, also attach the included additional fitting to the marked holes in the drawer front.
